

“Stop banging blinds use The FORCE”

noise reduction device for blinds in breezes.....

it's an age old problem with a new age solution

Sleepwell and feel **FABULOUS**

buy it at

Blind Systems & Textiles

..... what ???

Finally, a revolutionary silent solution for banging blinds!

The **FORCE**

No more shoes or pillows jammed behind the blinds to deaden the sound of them banging sleep in silence, use the **FORCE**, have fresh air circulating while still enjoying the function of the blind, privacy, room darkening or protection from the sun.

A solution taken very seriously!

Almost everybody has a story like “I put socks behind my blinds” or “I have pillows in the windows”. I have actually heard of people taking the base rail off the blinds to stop the noise!

What is the **FORCE** ?

The **FORCE** is a magnetic field, the solution was simple, getting it to work wasn't as easy.

However years of reckless experimentation ,sleepless nights and endless cups of coffee resulted in a working prototype.

A balanced magnetic force field strong enough to stop the blind rail hitting the wall or window, it is a break through for the blind industry and sleepless customers.

Check out our website to watch the animated video.
